PREFACE

v

AN OVERVIEW

*Shigeaki Fujisaki* .... xix

## INTRODUCTION: DEVELOPMENT AND THE ENVIRONMENT: ISSUES TO BE DISCUSSED

### 1 Development and the Environment: Experiences of Japan and Industrializing Asia

*Shigeaki Fujisaki*

- I. Rethinking Economic Growth and Its Implication for Resources and the Environment..... 1
  - 1. The right to develop and the growth debate
  - 2. The impact of growth on resources and the environment
  - 3. The “steady-state” theory revisited
- II. Global Environmental Problems and the Developing Countries ..... 6
  - 1. The Earth Summit and the developing countries
  - 2. Environmental awareness and the advantages of backwardness
  - 3. Poverty and the environment—The tasks confronting the developing countries

### 2 New Developments in Environmental Law in East Asia

*Naoyuki Sakumoto*

- I. Characteristics of Environmental Problems in East Asia ..... 26
- II. Characteristics of Environmental Law in East Asia ..... 27
  - 1. Forms of environmental laws and how they are enacted
  - 2. Relationship with the reception of law
- III. Environmental Law: New Developments and Their Background ..... 30
  - 1. Stages of development in environmental law
  - 2. Directions in environmental law developments
  - 3. Background of developments in environmental law

## PART I DEVELOPMENT AND THE ENVIRONMENT: EXPERIENCES OF JAPAN

### 3 The Development of Japanese Environmental Policy, and Its Implications for Asian Countries

*Toshiko Akiyama*

- Introduction ..... 34
- I. Japanese Environmental Policy and Its Features..... 35
  - 1. Concept and philosophy of environmental policy
  - 2. Pollution control and conservation of the natural environment
  - 3. Environmental quality standards and effluent/emission standards
  - 4. Direct regulation

5. Subsidy and the polluter pays principle	
6. Institutional measures	
7. Pollution control technologies	
8. Environmental policy of local governments	
9. Citizens' participation and freedom of information	
II. Future Tasks.....	46
1. The relationship between environmental policy and other major policies	
2. Social institutions for dealing with large ecosystems	
III. Implications for Other Asian Countries.....	48
<b>4 Environment and Economy: Lessons of Japan's Environmental Problems and Policies</b>	
	<i>Kazuhiro Ueta</i>
I. Introduction.....	55
II. Pollution Control Policy in Japan: Some Critical Issues.....	55
1. Environmental regulation vs. technological development: The case of car exhaust standards	
2. The role of local governments in pollution control	
III. Polluter Pays Principle: The Case of Japan.....	61
1. Environmental expenses in Japan	
2. Pollution control investment costs	
3. Subsidizing policy vs. polluter pays principle	
IV. Thinking of the Japanese Model.....	64
V. Conclusion.....	65
<b>5 A Critical Review of Pollution Issues and Environmental Policy in Japan</b>	
	<i>Shun'ichi Teranishi</i>
I. Introduction—The Purposes of This Paper.....	68
II. Historical Overview of Pollution Issues in Japan.....	68
1. Pollution problems before the Meiji era	
2. Aggravation of pollution in the Meiji era	
3. Changes in pollution issues in the Taisho period and the early Showa period	
4. Further aggravation of pollution in postwar Japan	
III. Critical Analysis of "Successful" Anti-Pollution Measures in Japan.....	72
1. Measures for SO <sub>x</sub> control since the latter half of the 1960s	
2. Reasons for the success of Japan's SO <sub>x</sub> control measures, and their limitations	
IV. Conclusion—Characteristics of Japan's Environmental Policy and Future Issues.....	77
<b>6 World Bank Metropolitan Environmental Improvement Program (MEIP): Results of a Study on the Japanese Experience in Urban Environmental Management, and Summary of the Japan Seminar</b>	
	<i>Kazuhiko Takemoto and Nahoko Nakazawa</i>
I. Introduction.....	79

II. Summary of the National Report .....	80
1. The Japanese experience	
2. Evaluation of Japan's experience	
3. Conclusion	
III. Summary of the Case Studies (Common Issues) .....	90
1. Common issues	
2. Special characteristics of each city	
IV. Summary of the Japan Seminar .....	92
V. Summary .....	93

## **7 Experiences and Future Perspectives of Japan's Energy Strategy**

*Haruki Tsuchiya*

I. The Energy Situation during the Last 20 Years .....	94
1. The oil crisis	
2. Second energy crisis	
3. Global warming	
4. Historical experiences	
II. Energy Strategy to Cope With Global Warming .....	96
III. The Long-Term Energy Supply and Demand Outlook .....	96
IV. End-Use Efficiency Improvement and Renewables.....	98
V. Macroeconomic Frame.....	98
VI. Energy Balance Table .....	99
VII. The Policies of the Alternate Scenario .....	100
1. Improved efficiency in the industrial sector	
2. More efficient electric appliances	
3. Improved efficiency in the residential and commercial sector	
4. Fuel-efficiency improvements in automobiles and trucks	
5. Reforming social infrastructure	
6. Introduction of cogeneration systems	
7. Low-carbon fuels	
8. Renewable energy	
VIII. Energy Demand and CO <sub>2</sub> Emissions .....	104
IX. Lifestyle Change—The Last Card .....	106
X. Toward an Energy Cultivating Civilization.....	108

## **8 Recent Trends of Pollution Suits and the Impacts of Case Law**

*Shoichi Ogano*

Introduction .....	109
I. Recent Trends of Pollution Suits.....	110
1. Compounded air pollution in big cities	
2. Air pollution from automobile exhaust gas	
3. Water pollution by organic mercury	

4. Conclusion	
II. The Impacts of Case of Law .....	116
1. Impacts on the evolution of legal theory surrounding illegal acts	
2. Impacts on new legal systems and policies of the national government	
3. Impacts on protest movements by affected residents	

## 9 Environmental Protection and the Role of Lawyers

*Tetsuo Murata*

I. Introduction .....	120
II. Japan's Lawyer System .....	120
III. Environmental Lawsuits and Lawyers .....	121
1. Early cases	
2. Cases from 1975 and thereafter	
IV. Activities of JFBA and the District Bar Associations .....	124
1. Surveys	
2. Symposium reports	
3. Publication of opinions	
4. Legislative proposals	
5. Publications	
V. JFBA's International Activities .....	125
VI. The Significance and Character of Lawyers' Activities in Japan.....	126
VII. Hoped-for Future Role of Lawyers .....	127

## 10 History, Structure and Characteristics of Japan's Environment Law

*Yoshihiro Nomura*

I. History .....	128
1. Origin of pollution problems in Japan	
2. Postwar pollution and ordinances	
3. Shift from ordinances to laws	
4. Shift from separate laws to basic framework law	
5. "Pollution Diet" in 1970	
6. Court rulings on four major pollution lawsuits	
7. From pollution to environmental protection	
8. Review of Japanese policy by OECD Environment Committee	
9. Japan's economic growth and global environment	
10. Global environmental problems	
11. UNCED and basic environment law	
II. Structure and Characteristics of Japan's Environment Law .....	130
1. Systemic characteristics of Japan's environment law	
2. Characteristics of pollution control laws	
3. Characteristics of Japan's natural environment protection law	
III. Basic Environment Law and Future Problems .....	139
1. Philosophy (Articles 3-5)	
2. Responsibilities (Articles 6-9)	

3. Basic policy measures on environmental conservation

## **11 Environmental Problems and the Role of Local Governments: Coping with Pollution in Yokohama City**

*Fukashi Utsunomiya*

I. Introduction .....	142
II. Environmental Problems and Environment Administration in Yokohama City .....	143
1. Present state of and countermeasures to air pollution	
2. The history of environmental policy of Yokohama municipal government	
3. Air pollution control and the evaluation of the Yokohama system	
III. Conclusion .....	156

## **PART II DEVELOPMENT AND THE ENVIRONMENT: EXPERIENCES OF EAST ASIA**

### **12 Influences of China's Industrial Development on Environment**

*Wu XinXin, Wang Fenyu, and Deng Xueming*

Preface .....	158
I. Industrial Development since the Adoption of Reform and Open-Door Policies .....	158
1. General trend of industrial growth	
2. Development of township enterprises	
II. Environmental Pollution Caused by Industrial Development .....	160
1. Atmospheric pollution caused by industry	
2. Water pollution caused by industry	
3. Pollution caused by solid industrial wastes	
III. Chinese Government Endeavors and Goals for Controlling Industrial Pollution in the 1990s .....	163
1. Monitoring and controlling industrial pollution sources in 300 key pollution industrial enterprises	
2. Monitoring to cope with the 10 major polluting industries of the township enterprises	
IV. Main Factors Causing Industrial Pollution, and Main Measures Enacted ...	169
1. Imperfect systems of environmental policies, laws and regulations	
2. Antiquated production technology and equipment	
3. An imperfect system of environmental protection offices	
4. Poor sense of the environment	

### **13 Environmental Law and Administration: The Case of China**

*Zou Hailin*

I. Introduction .....	176
II. Chinese Environmental Laws and Their Situations .....	177
1. Constitutional environmental provisions	
2. Basic Environmental Protection Law	

3. Laws for protecting environmental components against pollution	
4. Laws concerning the rational use and protection of natural resources	
5. Environmental regulations and rules	
6. Environmental provisions under other laws	
7. Basic systems for the environmental protection and improvement	
8. The prospects for Chinese environmental law	
III. The Environmental Administration in China.....	185
1. The structure of environmental administration	
2. Strengthening the environmental administration	
3. Compulsory measures for environmental administration	
4. Reconsideration and procedures by environmental administration	
5. Environmental administrative mediation	
IV. Conclusion .....	192
<b>14 Mainland China Grows into the World's Largest Source of Environmental Pollution</b>	
	<i>Reeitsu Kojima</i>
Introduction .....	193
I. Rapid Economic Growth and Industrial Structures in East Asia .....	193
II. Consumption—The Rapid Spread of the American Way of Life .....	196
III. China's Inherently Negative Environmental Conditions.....	201
IV. Development Over Time of Environment Measures and Their Achievements in China.....	204
1. Development of environmental policies	
2. Achievements and the present state of affairs	
3. Investment in environmental protection	
V. In Light of the Japanese Experience .....	210
<b>15 Tradeoff between Economic Development and Environmental Protection: The Case of Taiwan</b>	
	<i>Yusen D. Sung</i>
I. Introduction .....	212
II. Economic Development in Taiwan.....	212
III. Environmental Problems in Taiwan.....	214
1. Environmental pollution	
2. Natural resource conservation	
IV. Industry Responses to Environment Regulations.....	221
V. Government Policy Formation and Law Enforcement.....	222
VI. Conclusion .....	225
<b>16 The Political Economy of Industrial Pollution in Taiwan</b>	
	<i>Tadayoshi Terao</i>
I. Introduction .....	227
II. State of Economic Development and Pollution.....	227

III. The Development of Heavy Industries and Its Pollution by Public Enterprises.....	233
1. The petroleum industry	
2. Thermal power plants	
IV. Pollution by Medium and Small Enterprises: Metal Scrap Treaters.....	235
V. Pollution Prevention Investments by Enterprises.....	237
VI. The Deterioration of the Investment Environment and Responses of Large-Scale Private Enterprises.....	239
VII. "Developmentalism" and Industrial Pollution—Taiwan's Experience.....	240
VIII. Measures against Pollution and "the Advantages of Backwardness".....	244
<b>17 The Complex Assortment of Economic Incentives for Environmental Protection: A Focus on Taiwan's Experiences</b>	
<i>Tsong-Juh Chiu, and Ching Pou Shih</i>	
I. Introduction—The Ideal and the Achievement of Economic Incentives for Environmental Protection.....	246
II. Economic Incentives Used on Taiwan: A Historical Overview.....	246
1. Economic incentives	
2. Development of the economic incentives	
III. Economic Incentives in Taiwan: An Analysis of the Current Situation.....	249
1. The effluent free system	
2. The good neighbor expenditures	
3. The arrangement of the power development foundation	
IV. Economic Incentives in Taiwan: Affirmative or Negative Effects.....	256
1. Affirmative functions of the ERM	
2. Painful experiences	
3. Hesitation and indecision in economic incentives	
V. What the Future Holds—In Lieu of a Conclusion.....	258
<b>18 Environment and Development: South Korea's Taegu Water Pollution Case</b>	
<i>Tamio Hattori</i>	
Introduction.....	259
I. Background of Taegu Incident.....	259
II. The Nagdonggang River Phenol Pollution Incident.....	262
III. Problems Involved.....	265
1. Problems with industrial policy and industrial structure	
2. Anti-chaebol feelings	
3. Problems in the environment preservation system	
4. Media responses	
Conclusion.....	269

## 19 The Political Economy of Environmental Protection in Korea

*Dalgon Lee*

I. Introduction .....	271
II. Environmental Protection in the Development Era .....	272
III. Conservative Policy Responses .....	274
IV. Changes in Politics .....	277
V. Promoting Partnership and Cooperation .....	279

## 20 Economic Growth and the Environment: Korea's Experience and the Policies for Sustainable Development

*Sang-Gon Lee*

I. Introduction .....	283
II. Review of the Economic Development .....	284
1. Overview	
2. Review of development and policies	
3. Recent changes since 1986	
III. Development and the Environmental Issues .....	286
1. Industrial structure	
2. Energy and environment	
3. Urbanization and traffic congestion	
IV. The State of the Environment .....	289
1. Air pollution	
2. Water pollution	
3. Waste	
4. Coastal marine pollution	
V. Environmental Policy: Directions and the Measures for Sustainable Development.....	291
1. Introduction and review	
2. Environmental policy in the new economy plan	
3. Policy "infrastructure"	
4. Other measures and programs	

### PART III DEVELOPMENT AND THE ENVIRONMENT: EXPERIENCES OF SOUTHEAST ASIA

## 21 Industrial Policy and Industrial Waste Countermeasures in Thailand

*Mikimasa Yoshida*

I. Economic Development and Structural Changes in Thailand's Economy ...	297
II. Development of Industrial Policy .....	298
III. Progress in Industrialization.....	302
1. Petrochemicals	
2. Steel	
3. Paper/pulp	
4. Electrical/electronics industry	

IV. Development of Environment Policies .....	305
1. Present state of industrial pollution	
2. Development of industrial pollution measures	
3. Strengthening of environmental measures under the seventh development plan	
4. New moves by Japanese companies	
<b>22 Environmental Protection under the Enhancement and Conservation of National Environmental Quality Act B.E.2535 (A.D.1992) in Thailand</b>	
<i>Sunee Mallikamarl</i>	
I. The Necessities to Enact the Basic Environmental Law .....	310
II. Reason to Amend the Basic Environmental Law .....	311
1. Refusal to accept general public's awareness	
2. Law enforcing agencies	
3. Loopholes of the law	
III. Reenactment of Basic Environmental Law.....	312
1. National Environment Board (NEB)	
2. Environmental Fund	
3. Environmental protection	
4. Pollution control	
5. Promotional measures	
6. Civil liability	
7. Penalties	
IV. Agencies Responsible .....	321
V. Notes on New Principles of Law in Act.....	323
<b>23 Development and the Environment: Philippine Forestry Management in Transition</b>	
<i>Germelino M. Bautista</i>	
Introduction .....	326
I. Economic Development and Natural Resources .....	327
II. The Loss of Philippine Forests, State Management of Natural Resources and the Development of the Wood Industry .....	330
1. The loss of Philippine forests	
2. The state's natural resource management	
3. The development of the wood industry	
4. The loss of the forest's regenerative capacity and the role of the state revisited	
III. Responses to the Environmental Problem.....	339
1. Information generation	
2. Forest protection and the development and management of the residual forest	
3. Proper pricing of forest resources	
4. Enforcement of forest regulations	
5. The promotion of equity	
Concluding Notes: Issues in Efforts to Conserve the Forest .....	343

## **24 Enforcement of Environmental Regulation in Indonesia**

*Koesnadi Hardjasoemantri*

I. Introduction .....	348
II. Provisions within the EMA 1982 .....	349
III. Dissemination of Knowledge on Environmental Regulation .....	352

## **25 Economic Development and Pollution in Indonesia**

*Michikazu Kojima and Norio Mihara*

I. Macroeconomic Growth and Structural Change .....	355
1. Rapid industrial growth propelled macroeconomic growth	
II. Industrial Growth and Structural Change .....	355
1. Structural change in the manufacturing industries	
2. An overview of industries causing heavy environmental burdens	
III. State of the Environment .....	364
1. Water pollution	
2. Air pollution	
3. Solid wastes	
IV. Environmental Policy .....	367
V. Comparison with Japan in the 1960s .....	370
VI. Progress in Environmental Policy, and Japan's Experience .....	371

## **26 Economic Development and Environmental Management in Malaysia**

*Sham Sani*

I. Introduction .....	375
II. Development and Environmental Degradation .....	378
III. Environmental Management Responses .....	381
IV. Management Issues and Constraints .....	387
V. Concluding Remarks .....	391

## **27 Transnational Industrial Operations and Hazardous Waste Management in Developing Countries**

*Masahisa Nakamura*

I. Introduction .....	394
II. Direct Investment and Waste Generation: The Malaysian Experience .....	395
III. Economic Policy and Environmental Structural Impediments .....	397
IV. Overcoming Impediments .....	398
1. Responsibilities of the investing countries	
2. Host countries' responsibilities	
V. Concluding Remarks .....	400

## PART IV DEVELOPMENT AND THE ENVIRONMENT: SOME INTERNATIONAL ASPECTS

### **28 Economic Development in Asia and Environmental Issues: Looking at Foreign Direct Investment**

*Kayoko Kitamura*

I. Introduction of Foreign Direct Investment (FDI) and Progress in Industrialization .....	401
II. Characteristics of Industrialization in East Asia and Areas for Future Improvement .....	403
III. FDI from Asian NIEs Countries: Emergence and Their Influence.....	404
IV. Industrialization and Responsibility of Foreign Corporations.....	406
V. Responsibility of Host Country .....	407
VI. Policy Coordination between FDI Introduction and Environmental Protection.....	408

### **29 Economic Development and Environmental Issues in Asia: Focusing on Official Development Aid**

*Katsuya Mochizuki*

Introduction .....	410
I. Performance of Japanese ODA.....	411
1. Historical background of the emphasis on Asia	
2. Observations	
II. Performance of Japanese Environmental ODA .....	414
1. Transfer of technology and know-how	
2. Present level of environmentally-related Japanese ODA	
3. Several problems related to environmental ODA	
III. Japan's Role in Post-UNCED Era.....	417
1. The general direction thus far	
2. Technological perspectives	
3. Initiatives in Asia-Pacific region	
Conclusion .....	419

### **30 Regional Cooperation in the Field of Environmental Law in Asia**

*Naoyuki Sakumoto and Hidenori Inoue*

Introduction .....	421
I. The Issues in Perspective .....	422
1. Environmental problems in perspective	
2. Issues concerning regional cooperation	
3. Prerequisites for regional cooperation	
II. The Current State of Regional Cooperation.....	424
1. The East Asian region	
2. Southeast Asia, South Asia and the South Pacific region	
3. The state of environmental cooperation within Asia as a whole
