## IDE DISCUSSION PAPER No. 439

### **Promoting Institutional Connectivity in the Asia Pacific Region: A Study of Supply Chain and Trade in Services**

Hikari ISHIDO\*

January 2014

#### **Abstract**

This paper analyzes “institutional connectivity”, or the degree of seamless trade in services centering on the distribution sector. Foreign equity participation in mode 3 (commercial presence) of trade in services and business firms’ investment performance has been studied closely. Net economic benefits of transparent institutional connectivity in the wholesale sector have also been revealed statistically in the case of Japan’s bilateral FTAs with other APEC members. Given these results, APEC could work on establishing its own harmonized “service trade commitment table” with only the foreign capital participation as its simple policy restriction. This would surely enhance an APEC-wide, institutional supply chain connectivity.

**Keywords:** Trade in services, ASEAN Framework Agreement on Services (AFAS), supply chain, Trans-Pacific Partnership (TPP)

**JEL classification:** F13, F15

The Institute of Developing Economies (IDE) is a semigovernmental, nonpartisan, nonprofit research institute, founded in 1958. The Institute merged with the Japan External Trade Organization (JETRO) on July 1, 1998. The Institute conducts basic and comprehensive studies on economic and related affairs in all developing countries and regions, including Asia, the Middle East, Africa, Latin America, Oceania, and Eastern Europe.

# Promoting Institutional Connectivity in the Asia Pacific Region: A Study of Supply Chain and Trade in Services

Hikari Ishido<sup>1</sup>

**Abstract:** This paper analyzes “institutional connectivity”, or the degree of seamless trade in services centering on the distribution sector. Foreign equity participation in mode 3 (commercial presence) of trade in services and business firms’ investment performance has been studied closely. Net economic benefits of transparent institutional connectivity in the wholesale sector have also been revealed statistically in the case of Japan’s bilateral FTAs with other APEC members. Given these results, APEC could work on establishing its own harmonized “service trade commitment table” with only the foreign capital participation as its simple policy restriction. This would surely enhance an APEC-wide, institutional supply chain connectivity.

**Keywords:** Trade in services, ASEAN Framework Agreement on Services (AFAS), supply chain, Trans-Pacific Partnership (TPP)

**JEL classification:** F13, F15

## 1. Introduction

Promoting institutional connectivity in the Asia Pacific region is high on APEC agenda, since there is a close positive correlation between an efficient supply chain and region-wide economic development. An efficient supply chain includes liberalized and seamless trade in services especially in the logistic-related sectors, e.g., transportation and distribution services. This paper therefore makes an analysis of “institutional connectivity”, or the degree of seamless trade in services centering on the distribution service. The next section makes an overview of the limits on foreign capital for firms establishing a commercial presence in the wholesale sector. Section 3 conducts a more quantitative analysis of the economic impacts of FTAs in the wholesale sector, taking the case of Japan’s bilateral FTAs with other APEC members. Section 4 concludes this paper with some policy suggestions.

## 2. Limits on foreign capital for firms establishing a commercial presence in the wholesale sector

The institutional connectivity of an APEC-wide supply chain can be seen by looking at policy restriction on the “Mode 3” of service trade provision, i.e., supply of supply chain services through establishing a commercial presence in the local market. Among

---

<sup>1</sup> Professor and Director of APEC Study Center, Chiba University (Japan).

various government restrictions, “limits on foreign capital” is the most transparent restriction. Indeed, the upper limit of foreign equity participation, much like ad-valorem tariffs in the case of commodity trade, is the simplest form of government restriction in services trade. This section therefore focuses on the way in which each of the APEC members sets limits on foreign capital in the form of setting limits on foreign equity participation.

APEC has launched its “Services Trade Access Requirements (STAR) Database” (<http://www.servicestradeforum.org/>). This site makes it easier to export services globally by database provision: The online database helps to identify the requirements to trade with and invest in other APEC economies. It covers computer & related services, distribution, education, financial services (banking and insurance), mining and energy, professional services (legal, accounting, architecture and engineering), telecommunications, transportation & logistics service sectors. In this section, the regulation on “distribution” (including retail and wholesale services) has been extracted. Following is the result of database extraction by economy for the distribution sector. Since the space is limited, the listing of the types of restrictions and the content of “Limits on foreign capital” (if any) are listed.

### **Australia**

There are two types of restrictions, “Licensing requirements” and “Restrictions on type or scope of services”. There is no restriction in terms of “Limits on foreign capital”.

### **Brunei**

There is one type of restriction, i.e., “Limits on foreign capital”: Foreign equity participation in packaging services should not exceed 30%.

### **Canada**

There are two types of restriction, “Restrictions on type of legal entity” and “Limits on foreign capital”. The “Limits on foreign capital” reads:

There are no foreign ownership restrictions on distribution services, subject to the requirements of the Investment Canada Act. Refer to General Requirements.

Some restrictions apply to the distribution of books, music and films.

- 100 % foreign equity is allowed in an enterprise to publish, distribute and sell periodicals, but all foreign investments are subject to review by the Minister for Canadian Heritage.
- Foreign takeovers of Canadian-owned and controlled distribution businesses, including distribution of books, magazines, periodicals; films and music which are

considered to be part of Canada's cultural industry are not allowed.

- Direct and indirect takeovers of foreign distribution businesses operating in Canada are permitted only if the investor undertakes to reinvest a portion of its Canadian earnings in Canada. The establishment of new film distribution companies in Canada is permitted only for importation and distribution of proprietary products.

### **Chile**

There are no requirements specific to distribution services identified.

### **China**

There is just one type of restriction, “Limits on foreign capital”, which reads:

A foreign investor is required to establish a Foreign Invested Enterprise (FIE) in order to provide distribution services. Foreign investors must have good standing and credit, and must not have violated Chinese laws, rules, or regulations. Foreign investors that possess comparatively strong economic power, advanced marketing skills and managing experiences, and wide international marketing network are encouraged to establish Commercial FIES.

A foreign investor that has opened a total of more than 30 stores in the PRC is not allowed to hold more than 49% equity interest in a joint venture Commercial FIE if the goods it sells include books, newspapers, magazines, pharmaceuticals, pesticides, mulching films, fertilizers, finished oil products, grain, vegetable oil, sugar for human consumption, and cotton.

Commercial FIEs are required to have minimum registered capital as described under the Company Law of China and must abide by the relevant regulations on registered capital and total amount of investment for FIES. In general, the operating period for Commercial FIEs shall not exceed 30 years, 40 years for central and western regions.

The People's Republic of China outlines a number of procedures to be followed for the establishment of a Commercial FIE. These are set out in the Measures for the Administration of Foreign Investment in the Commercial Sector (2004).

### **Chinese Taipei**

Data not available.

### **Hong Kong China**

Data not available.

### **Indonesia**

There are two types of restrictions, “Limits on foreign capital” and “Restrictions on type of legal entity”. Below is the “Limits on foreign capital”:

Foreign capital ownership is prohibited for the following:

- commission agents in fee or contract based large trade and imports.
- large importers, distributors and sub-distributors of alcohol and for retailers of

beverages containing alcohol.

the distribution of forest plant seeds and germs, and film distribution.

retail trading including supermarkets with a selling floor area less than 1,200 metres squared, department stores with a selling floor area less than 2,000 metres squared, mini-markets with a selling floor area less than 400 metres squared, convenience stores and community stores.

Foreign capital ownership is also prohibited in small retailer trade of commodities and agricultural products including: rice and seasonal crops, fruit, vegetables, animal husbandry products, fishery products, decoration plants and other agricultural products, processed beverages, bread, pastries, cakes, brown sugar, tofu, tempe, tauco, oncom, meat and processed aquatic biota, cigarettes and tobacco, animal feed, poultry feed, fish feed, processed food and beverages, chemical , pharmacy, cosmetic materials, laboratory equipment, traditional medicine, fertilizer and pest eradication, volatile oil, textiles, finished clothes, footwear, personal necessities, shoes and footwear, cloth accessories and thread, glasses, jewellery, watches, bags and suitcases, household and kitchen appliances, electronics, electrical instruments and equipment, glassware and kitchen appliances made of plastic/melamine/stone/clay/wood/bamboo/rattan, cleaning appliances and other household appliances, fuel, gas, lubricant, paper, paper made goods, stationery, printed items, sports equipment, musical instruments, photographic instruments, computers, toys, antiques, etc.

Foreign capital ownership is restricted in many mobile small retailer trades.

### **Japan**

There are no measures specific to distribution services identified.

### **Korea**

There are two types of restrictions, “Licensing requirements” and “Restrictions on type or scope of services”. There is no restriction in terms of “Limits on foreign capital”.

### **Malaysia**

There are three types of restrictions, “Incorporation requirements”, “Limits on foreign capital” and “Restrictions on type of legal entity”. Of these, the “Limits on foreign capital” reads:

Under the Guidelines for Foreign Participation in the Distributive Trade Services (the Guidelines), all proposals for foreign participation in distributive trade must be approved by the Ministry of Domestic Trade Co-Operatives and Consumerism (MDTCC). This includes the opening of new branches, relocation, expansion of existing branches/outlets, and buying over/taking over of outlets of other operators.

Foreign involvement is not permitted in certain sectors. This includes:

- supermarket / mini market (less than 3,000 square meters sales floor area);
- provision shop;
- convenience store that open for business for 24 hours;
- news agent and miscellaneous goods store; and

medical hall (inclined towards traditional / alternative medicine plus general dry foodstuff).

Fuel Station with or without a convenience store

Textile, restaurant (non exclusive), bistro, jewellery shops.

Permanent pavement store.

Permanent wet market store.

This list is not exhaustive. New categories may be introduced by the MDTCC.

A 30% Bumiputera shareholding requirement applies for the setting up of hypermarkets in Malaysia that involves foreign participation. Hypermarket operators are not allowed to open new branches unless this shareholding requirement has been fulfilled. If the requirement is not met at the time of application, a grace period of 3 years for compliance of the same may be given depending on the merits of each case. The power to grant extension(s) for compliance is at the discretion of the MDTCC.

The Guidelines also impose minimum capital requirements for entities with foreign participation:

RM 50 million for hypermarkets.

RM 20 million for departmental stores (review every 3 years).

RM 25 million for supermarkets.

RM 1 million for each specialty outlet (review every 3 years).

Department stores, supermarkets, and shopping malls must reserve 30% of the shelf space for products made by Malaysian SMEs. These restrictions and reservations are currently under review by the Government. See restrictions on scope of services for a firm supplying services in the local market.

### **Mexico**

There are two types of restrictions, “Limits on foreign capital” and “Nationality requirements”. Of these, the “Limits on foreign capital” reads:

The retail trade in petrol and other petroleum derivatives, which can be carried on through PEMEX franchises, and the distribution of LPG, are reserved for Mexican natural persons and companies with an exclusion clause for foreigners.

Some trade union and cooperative retail stores may not allow foreign investment.

The commercial distribution of alcoholic beverages and drinkable water is restricted to Mexican nationals. See nationality requirements below.

### **New Zealand**

There are two types of restrictions, “Licensing requirements” and “Restrictions on type or scope of services”. There is no restriction in terms of “Limits on foreign capital”.

### **Papua New Guinea**

Data not available.

## **Peru**

Data not available.

## **Philippines**

There are three types of restrictions, i.e., “Incorporation requirements”, “Limits on foreign capital” and “Restrictions on type of legal entity”. Of these, the “Limits on foreign capital” reads:

Restrictions on foreign investment in retail trade vary depending on the category of investment. Categories that apply to investments are as follows:

Paid-up capital of less than US\$2,500,000: Filipino-owned only.

Paid-up capital of US\$2,500,000 or more: both Filipino and foreign-owned; provided that for putting up a store, a minimum of US\$830,000 is invested. At least 30% of the aggregate stock inventory must be made in the Philippines.

Paid-up capital of US\$7,500,000 or more: both Filipino and foreign-owned; provided they have same US\$830,000 minimum investment and 30% stock inventory requirement

Business specializing in high-end or luxury goods, with paid-up capital of US\$250,000 per store: both Filipino and foreign-owned. At least 10% of the aggregate stock inventory must be made in the Philippines.

Corporations under the first two categories above whose shares of stock are 80% foreign-owned must offer at least 30% of their shares of stock at the stock exchange within 8 years from beginning of operations. Foreigners can invest in local retailers.

Foreign retailers are subject to the following limitations:

The parent corporation must have a minimum net worth of US\$200,000,000 (or US\$50,000,000 in case of those who specialize in luxury goods or high-end products.)

The company must have at least 5 branches operating anywhere around the world or at least one 1 store with a capital of US\$25,000,000.

It must have a track record of at least 5 years in the retail business.

Only countries that allow Filipinos to go into retail trade in their territories are allowed to conduct retail trade.

For Commission Agents’ Services (except in the rice and corn industry) delivered by ASEAN investors, 100% foreign equity participation is allowed in the following cases:

paid-in equity capital is not less than US\$200,000 for domestic market enterprises; or

paid-in equity capital is not less than US\$100,000 for domestic market enterprises employing at least 50 direct employees; or

paid-in equity is not less than US\$100,000 for domestic market enterprises involving advanced technology as determined by the DOST; or,

the agent exports 60% or more of its output.

Otherwise, only up to 40% foreign equity participation is allowed.

Foreign retailers wishing to invest in the Philippines need to pass the pre-qualification procedures of the Department of Trade and Industry (DTI) subject to the provisions of Retail Trade Liberalization Act.

### **Russia**

Data not available.

### **Singapore**

There are two types of restrictions, “Limits on foreign capital” and “Restrictions on type of legal entity”. The “Limits on foreign capital” reads: Only Power Gas is allowed to transport and distribute manufactured and natural gas (piped gas).

### **Thailand**

There are two types of restrictions, “Limits on foreign capital” and “Restrictions on type of legal entity”. The “Limits on foreign capital” reads:

A foreign investor can hold a majority stake in a retailing or wholesaling business only if it puts in Bt100m in capital or at least Bt10m per unit; otherwise foreign ownership is restricted to 49%.

Foreign participation in commission agents’ services must not exceed 49%.

Thailand also imposes a 49% limit on foreign ownership in land transport (trucking).

Thailand’s Postal Act (1934) gives the government a monopoly on handling letters and postcards.

In compliance with the Ministry of Finance Announcement (Liquor Administration) B.E. 2543 (2000), distilled liquor distribution services must be operated by a limited company under Thai laws with foreign equity participation less than 49%.

### **United States**

There are three types of restrictions, i.e., “Limits on foreign capital”, “Restrictions on number of service suppliers” and “Restrictions on type of legal entity”. Of these, the “Limits on foreign capital” reads: Foreign capital investment is restricted in the retail sale of alcoholic beverages, firearms and military equipment and the wholesale trade of alcoholic beverages, firearms and military equipment.

### **Viet Nam**

Data not available.

Overall, there is no harmonized supply chain connectivity observed in across the APEC members. This implies that if a harmonized connectivity measure is to be introduced in the APEC region, its trade/investment facilitation impacts would be large. How large would be the impact of such a measure? The next section attempts to highlight this very issue.

### **3. Analysis of the impact of FTAs on trade in services and the wholesale sector**

In the absence of APEC-wide regional economic integration (as mentioned above), a case study would be helpful when considering the potential economic impacts of an APEC-wide service trade liberalization. This section takes up Japan's bilateral FTA with other APEC members as a case study.

Toyokeizai Shimposha (a Japanese publisher) annually releases detailed statistics of Japanese foreign affiliates by host country. Table 1 shows the number of newly established service firms by economy, while Table 2 shows the Number of newly established manufacturing firms by economy. Figure 1 graphs the number of newly-established Japanese foreign affiliates in APEC member economies possessing (as of end-2012) service-covering bilateral FTAs with Japan (namely, Indonesia, Malaysia, Philippines, Singapore, Thailand and Vietnam). As clearly seen, trade creation (for the APEC member economies possessing bilateral FTAs with Japan) is observed in the service sector's investment performance, while on the other hand, trade diversion (i.e., decreasing share in terms of the number of foreign establishments) is observed in China (without such a service-covering FTA) as in Figure 2.

Table 3 calculates correlation coefficients of service-firms' number of new establishment and manufacturing-firms' number of new establishment: a positive correlation is observed overall (with the exception of Malaysia), which indicates that the manufacturing sector is encouraged by the service sector, and vice versa.

This dataset released by Toyokeizai Shimposha can be used for a more micro-based analysis featuring service firms' investment performance. For this study, the wholesale sector is chosen for an obvious reason: the sector directly serves manufacturing sectors. Appendix A shows the full list of the wholesale sector firms' attributes, covering, e.g., the parent company's name, its year of establishment (in Japan), its capital (in million yen), as well as the attributes of its foreign affiliates.

**Table 1. Number of newly established service firms by economy**

Combining this database and the Hoekman Index<sup>2</sup> (measuring the degree of service sector liberalization, as a figure between 0 and 1) for Mode 3 (commercial presence), a standard “binary logistic regression” has been conducted (out of the 891 observations in total, 232 observations –those firms investing in the FTA-possessing APEC member economies— have been used for this analysis). As it happened, the Hoekman Index has been calculated as equal to 1 (corresponding to “no restriction”) where a commitment is made. Thus, the Hoekman Index in this study is just equivalent to a dummy variable (“ServiceFTA dummy” in the Appendix A) taking the value of 1.0 when there is a commitment in the wholesale sector.

Table 4 shows the results of a binary logistic regression analysis. In sum, the analysis reveals the following three points for the wholesale sector: (1) the presence of an already effective FTA with a service sector commitment makes the likelihood (or the “odds ratio” as in the Table) of new service firms’ investment in the APEC member economy with the FTA 4.0329 times higher than would have been the case without such a service-covering FTA (and the 95% confidence interval of the odds ratio is between 1.3485 and 12.0609, as emphasized in bold in the Table—in any case, the ); (2) the presence of an already effective FTA with a service sector commitment makes the size – in terms of the number of workers (“Workers” in the dataset)— of the newly established firm a little smaller (0.9862 times bigger—actually smaller— as emphasized in bold in the Table); and (3) the presence of an already effective FTA with a service sector commitment makes the level of the parent firm’s equity participation (“Pequity” in the dataset) a little smaller (0.9762 times bigger—actually smaller— as also emphasized in bold in the Table).

---

<sup>2</sup> Hoekman (1995) proposes an objective indexation method for measuring the GATS-style degree of commitment in the service sector. This remains one of a few indexation methods that are objective in nature. This method assigns values to each of 8 cells (4 modes and 2 aspects--market access (MA) or National Treatment (NT)--), as follows: N=1, L=0.5, U=0; then calculates the average value by service sector and by country. Using the database constructed, the “Hoekman Index” has been calculated for the wholesale sector. For more details, see Ishido (2011).

Source: Calculated from the database constructed from Toyokeizai (2012).

With the use of firm-based surveys, further and more detailed analyses would be possible, for instance a discussion of newly established firms' sales performance would be beneficial (this has not been done for this study mainly for lack of relevant information<sup>3</sup>). Generally speaking, manufacturing and service activities are mutually reinforcing: manufacturing activities become dominant first (logically as well as historically), then the demand for service activities are enhanced and as a result, foreign service firms are established. In this context, supply chain connectivity in the APEC region is crucial in bringing about an intra-regional investment promotion. An APEC-wide FTA would facilitate service-sector investment on the whole; this would further promote commodity trade as well. In this sense, the APEC-wide supply chain connectivity has a potentially immense role.

#### **4. Policy suggestions**

An efficient supply chain includes liberalized and seamless trade in services especially in the distribution sector. This paper therefore has made an analysis of “institutional connectivity”, or the degree of seamless trade in services centering on the distribution sector. Current government restrictions in the distribution sector have been compared. It has been revealed that, overall, the APEC region still lacks policy harmonization in terms of enhancing institutional supply chain connectivity.

Net economic benefits of transparent institutional connectivity in the wholesale sector have also been revealed statistically in the case of Japan's bilateral FTAs with other APEC members. Thus, APEC could work on establishing its own harmonized “service trade commitment table” with only the foreign capital participation as its

---

<sup>3</sup> The sales figures in the database (Appendix A) are those of “the latest year” which varies across respondent firms. More precise year-by-year data would be needed for a quantitative analysis of the linkage between provision of FTAs and sales performance (i.e., trade figure in Mode3).

simple policy restriction.

It would be desirable for the APEC to design and conduct, in collaboration with the member economies, more comprehensive questionnaire-based *company surveys* on the issue of the impact of a harmonized APEC-wide FTA on business companies' service trade performance (mainly in Mode 3, i.e., supply of services through establishing a commercial presence).
