IDE-JETRO

Institute of Developing Economies

## About IDE

### *Our Goal: Intellectual Contributions to the World*

The IDE aims to make intellectual contributions to the world as a leading center of social-science research on developing areas. We accumulate locally grounded knowledge on these areas, clarify the conditions and issues they are facing, and disseminate a better understanding of these areas both domestically and abroad. These activities provide an intellectual foundation to facilitate cooperation between Japan and the international community for addressing development issues.
