

# Tables and Figures

## TABLES

- 2-1 Bovine Livestock Population in Pakistan, 1976 and 1986
- 2-2 Distribution of Sample Households
- 2-3 Number of Household Members of Sample Households
- 2-4 Acreage of Agricultural Land Operated / Owned by  
Sample Household
- 2-5 Number of Households Participating in Land Tenancy Markets
- 2-6 Years of Completed Education of Household Heads, 1990/91
- 2-7 Caste Composition of Sample Households
- 2-8 Household Income by Sources
- 3-1 Cropping Patterns of Sample Households
- 3-2 Per-Acre Yield of Cereals
- 3-3 Factor Inputs and Output of Basmati per Acre, 1990/91
- 3-4 Factor Inputs and Output of Wheat per Acre, 1990/91
- 3-5 Output Value and Input Costs of Production of Basmati  
per Acre, 1990/91
- 3-6 Output Value and Input Costs of Production of Wheat  
per Acre, 1990/91
- 3-7 Size of Livestock Holding
- 3-8 Milk Yields and Fodder Feeding
- 3-9 Number of Households Who Owned and Used Machinery

- 3-10 Irrigation Methods Adopted by Sample Households
- 3-11 Prices Actually Paid by Buyers of Tubewell Water
- 3-12 Tubewell Water Costs Borne by Tubewell Owners
- 3-13 Regression Results of Yield Multiplier Model
- 3-14 Regression Results of Yield Multiplier Model with Household Fixed Effects
- 4-1 Market Participation Experience by Sample Households
- 4-2 Regression Results of Time-Series Model for Market Prices
- 4-3 Summary Results of Price Regression Models
- 4-4 2SLS Estimation Results for Wheat Farm-Gate Prices
- 4-5 2SLS Estimation Results for Basmati Paddy Farm-Gate Prices
- 4-6 ML Estimation Results for Intertemporal Wheat Price Relations
- 5-1 Regression Results of Time-Series Model for Regional Average Revenues
- 5-2 CV and Correlation Coefficients of Prices and Average Revenues
- 5-3 CV and Correlation Coefficients of Prices and Net Profits at the Individual Farm Level
- 5-4 CV and Correlation Coefficients of Prices and Net Profits at the Individual Farm Level with Household Fixed Effects
- 6-1 Definitions and Statistics of the Empirical Variables
- 6-2 Estimation Results of the Household Model (Model A)
- 6-3 Statistics of Simulated Parameters
- 6-4 Estimation Results of Alternative Models (Model B)
- 7-1 Regression Results of Income Decomposition
- 7-2 Inter-Household Deterministic Variation of Income
- 7-3 Transient Variation of Income
- 7-4 Regression Results of Income-Consumption Co-movement
- 8-1 Classification of Sample Households by Fodder Market Participation in Each Cropping Season
- 8-2 Fodder Management by Sample Households
- 8-3 Simulation Results for Welfare Costs of Risk
- 8-4 Effects of More Elastic Fodder Demand
- 8-5 Effects of 20% Increase in Expected Fodder Yield per Acre
- 8-6 Effects of 20% Increase in Expected Cereal Prices

## FIGURES

- 2-1 Composition of Agricultural Value-Added, Pakistan
- 2-2 Relative Prices of Milk and Cereals, Pakistan

- 2-3 Income Sources by Size of Operational Land
- 3-1 Fodder Acreage and Livestock Herd Sizes in *Kharif*
- 3-2 Fodder Acreage and Livestock Herd Sizes in *Rabi*
- 3-3 Share of Fodder Acreage and Household Wealth in *Kharif*
- 3-4 Share of Fodder Acreage and Household Wealth in *Rabi*
- 4-1 Seasonality of Wheat Wholesale Prices and  
Public Wheat Releases
- 6-1 Decision Timing of the Household Model
- 6-2 Estimated Production Constraints and Observed Choices in *Kharif*
- 6-3 Estimated Production Constraints and Observed Choices in *Rabi*
- 7-1 Effects of Changes in Household Income Composition

## MAPS

- 2-1 Map of Pakistan and the Site of the Study Area
- 2-2 Location of Sample Villages
