

第9章 出生力と社会経済変数の相互依存度 —— 台湾地域への応用 ——

野田 容助

台湾地域の出生力は1952年から低下し始め、1964年に全国的な家族計画運動が開始されてからその低

下は急激になったが、この出生力低下の背景には経済・社会的な発展が存在していたといわれている。本章ではこれらの出生力と経済・社会的要因との間で因果関係が存在しているかどうかを統計的に検討することを課題とする。ここでいう因果関係とは過去の情報から将来を予測する予測誤差により定義されるグレンジャーの意味での因果関係である。変数間の相互依存度である因果関係の大きさと方向は時系列解析といわれる確率過程を前提にしたベクトル値自己回帰 (VAR) モデルによる相対的分散寄与率で計測される。

本章の課題は「発展途上国出生力の時系列分析——台湾地域への適用——」(野田、『発展途上国の出生率低下——展望と課題——』河野稠果編、研究双書no.424アジア経済研究所、1992)をもとにしているが、その内容について時系列分析の部分のみをさらに細かく検討し直したものである。野田(1992)はVarモデルの4つの変数として合計特殊出生率、実質GDP、高等教育を受けた人(男女)の割合、就業者数(男女)の割合としていたが本章では女性の要因を強調する意味で下記のように変数を変更した。また、台湾経済発展のキーとなる輸出をGDPに変えている。

因果関係の検討に必要とされる変数の特徴は第1節で紹介される。出生率は合計特殊出生率、経済・社会的要因としての変数は実質GDPの構成要素である輸出、高等教育を受けた女性の割合、女性の就業者数の割合とする。変数によっては指数的に上昇するトレンドを持っているので、定常状態にするためにそのような変数の変動要因を対数変換した後の線形トレンドからの乖離として定義する。また、線形トレンドの場合には変動要因をそのトレンドからの乖離として定義する。台湾地域の合計特殊出生率は平均にして約3%の減少であり、しかもほぼ直線的に低下する傾向にある。この下降傾向をもう少し詳しく検討するため線形トレンドからの乖離を出生率の変動として見ると、1970年の前半頃を境としてそれまでは加速度的に減少傾向にあったのがその減少が鈍ってきたことを示している。実質GDPにもとずく台湾の経済成長循環には約6年の中期循環と約3年の短期循環があるが、スペクトル分析によれば合計特殊出生率、輸出、高等教育を受けた女性の割合および女性の就業者数の割合の変動についても経済変動と似たような約10年を周期とする循環の存在が確かめられる。台湾経済の特徴としてはほとんどの企業が中小の工場からなっており、景気の良い悪いに敏感である。景気の変動のたびごとに労働者が都市と地方を行き来するくらいである。出生率も同じ傾向にあるといわれている。出生率は低下を辿っているとはいえ、景気の循環に沿った変動がみられることからこの仮説は正しいと想定できる。

第2節は、分析するデータの期間を前期と後期の2つに分ける転換点の推計である。構造変化の時点とその回数が知られていないときの推計方法としては、stepwise chow testによる繰り返しがあるが、ここでは t 値の代わりにAICを使用し、境界点を移動させたときにそれぞれの期間に当てはめたモデルの良さをAICにより評価するという方法を用いる。AICが最小になる境界の時点転換点とするように決める。これまでの事例では出生率の転換点は出生率の低下の加速度が鈍る1975年とみなされていたが、今回の結果では1971年となっている。後期は台湾経済に大きなショックを与えた第1次オイルショックの時期をふくむので、この部分を取り除いて1952-71年を前期、1975-90年を後期とする。以下の節では前後の期間で因果関係がどのように変化したかを検討することによって出生率に対する経済・社会要因の相互依存度を明らかにする。

第3節は予測相対寄与率による相互依存度の計測である。一般に経済統計は非定常状態の系列である。定常状態の系列に直すため、線形トレンドからの乖離のと階差の2つの方法を試みている。VARモデルを台湾の出生力の因果関係に応用するにあたって、まず最初はVARモデルの次数 p を決めることが必要であるが、この決定にはAICの最小値を持つモデルが最適であるというモデル選択の方法を用いる。モデルによる残差が互いに相関しあっている場合には瞬間的因果関係があるという。台湾では瞬時的な

因果関係の存在が確かめられ、予測相対寄与率を用いる理論的な根拠を失う。そのため、この残差を無相関にすることがこのモデルを用いる上で重要なポイントになる。なお、定常状態に直す方法のうち、階差はモデルの次数が高くなるうえ、第4章で適用する1因子モデルの残差が無相関であるという仮説を棄却してしまうためこの方法は用いないことにして、線形トレンドによる方法のみを以下の分析で採用することにする。

第4節は残差を無相関に直す2つの方法として、(1)Cholesky分解による解析的な直交化、(2)因子モデルによる直交化の適用を示す。この2つの方法より得られた相互依存度の結果からわかることは合計特殊出生率に対する経済・社会的要因の因果関係が存在するという仮説は支持されるということである。前期では合計特殊出生率に対する貢献度が高いのは輸出であるのに対して、後期は前期に貢献した輸出の影響がなくなり、変わって合計特殊出生率それ自身と女性の高等教育を受けた人の割合が影響を持ち始めることである。また、1因子モデルの共通変動の貢献度については、前期は共通変動の割合が高く後期になるにつれてその割合が減少してきている。このことは、前期は輸出の割合が合計特殊出生率に影響しているとはいってもお互いに関連し合う観測不可能な相互依存関係の影響が強くていていることを表している。なお、年データを用いた分析だけでは標本数が少なく、また、ラグ構造が明確に検出されないため詳細なる因果関係の判定は困難であると想定できる。

Attached Statistical Tables

付 表

Description of Attached Statistical Tables

1. INTRODUCTION

All the appendix tables presented in the present volume were compiled based on the individual data of the Demographic and Health Surveys Phase-I conducted by 28 developing countries (15 African, 3 Asian and 10 Latin American and Caribbean countries) in the late 1980's which are supplied by Data Archive, Demographic and Health Surveys, Institute for Resource Development, U.S.A.

During DHS surveys several types of questionnaires were used. A household schedule, an individual questionnaire of an eligible woman aged 15 to 49 and a husband's questionnaire in some countries were used. The most interesting of these data are the individual data which includes various types of data such as respondent's basic data, reproduction (birth history), contraception, maternity and feeding, health history, height and weight relating to living children born, marriage, fertility preferences, husband's characteristics and women's work. All data are used in identification code in variable Vnnn(n:serial number). The variable code is presented in parentheses at the end of each table title.

2. DESCRIPTION OF APPENDIX TABLES

Tables 1 to 27 present percentage distribution of women or husbands by various characteristics for 28 countries. The characteristics together with codes (as presented in the DHS code book: Description of the Demographic and Health Surveys Individual Record Data File, October 4, 1988 by Data Archive, Demographic and Health Surveys) are presented along the rows while the names of the 28 countries are shown in the columns. The row "Total" at the bottom of each table reflects the sample size of women for the respective countries.

Table 1. Presents percentage distribution of women by five-year age group based on data of V013. The figures 1 to 7 show the value of label for age group.

Table 2. Presents percentage distribution of women by current place of residence (urban/rural) based on data of V102.

Table 3. Presents percentage distribution of women by place of previous residence in their childhood based on data of V103. No data for Ecuador, El Salvador, Trinidad and Tobago, Botswana, Togo and Zimbabwe were available.

Table 4. Presents percentage distribution of women by highest education level attended based on data of V106. This is a standardized variable providing level of education in the following categories: No education, Primary, Secondary and Higher.

Table 5. Presents percentage distribution of women by literacy based on data of V108.

Table 6. Presents percentage distribution of households by major source of drinking water for members of the household based on data of V113. The codes used here were standardized from the country specific codes by the Institute of Developing Economies (IDE).

Table 7. Presents percentage distribution of households by type of toilet facility in the household based on data of V116. The codes used here were standardized from the country specific codes by IDE. No data for El Salvador is available.

Table 8. Presents percentage distribution of women by religion based on data of V130. The codes used here were standardized from the country specific codes by IDE. No data for Bolivia, Colombia, Dominican Republic, Ecuador, El Salvador, Guatemala, Mexico, Peru, Burundi, Morocco and Tunisia were available.

Table 9. Presents percentage distribution of women by their number of years of schooling completed based

on data of V133.

Table 10. Presents percentage distribution of households by household size based on data of V136. Total number of household members is the number of usual residents and the number of visitors who slept in the house the previous night that were listed in the household schedule. No data for El Salvador was available.

Table 11. Presents percentage distribution of women by number of co-living children under aged 6 based on data of V137. Visiting children are not included. No data for El Salvador was available.

Table 12. Presents percentage distribution of women by number of children ever born based on data of V201.

Table 13. Presents percentage distribution of women by number of living children based on data of V218.

Table 14. Presents percentage distribution of women by knowledge of contraceptive methods based on data of V301. Knowledge of any method is classified into modern and traditional methods as follows: Modern methods are Pill, IUD, Injection, Diaphragm/Foam/Jelly, Condom, Female Sterilization, Male Sterilization and Norplant. Traditional methods are Periodic Abstinence (Rhythm), Withdrawal, Abstinence, and any other country specific methods. If a respondent knows both a modern and a traditional method then she was coded as knowing a modern method.

Table 15. Presents percentage distribution of women by currently using contraceptive methods based on data of V312. Pregnant women are coded 0 "Not currently using". The contraceptive table contains entries for 12 standard contraceptive methods and country specific methods as shown in Table 15.

Table 16. Presents percentage distribution of women by type of currently using contraceptive methods categorized by the method as either a modern or a traditional method based on data of V313.

Table 17. Presents percentage distribution of women by main problems experienced with using the contraceptive method based on data of V339. No data for El Salvador, Ghana, Kenya, Liberia, Mali, Ondo State (Nigeria), Senegal, Sudan, Togo and Uganda were available.

Table 18. Presents percentage distribution of women by current marital status based on data of V501.

Table 19. Presents percentage distribution of women by age at first marriage or union based on data of V511.

Table 20. Presents percentage distribution of women by marital duration based on data of V513. Marital duration is actually the time since the start of the first marriage until the date of interview grouped into five year groups, irrespective of whether the

respondent is still married to her first partner or not.

Table 21. Presents percentage distribution of women by ideal number of children based on data of V613.

Table 22. Presents percentage distribution of ever married women by husband's highest level of education attended based on data of V701.

Table 23. presents percentage distribution of ever married women by husband's occupation based on data of V704. No data for El Salvador, Mexico and Liberia were available.

Table 24. Presents percentage distribution of ever married women by working status before her first marriage based on data of V709. No data for Bolivia, Brazil, El Salvador, Trinidad and Tobago, Liberia and Zimbabwe were available.

Table 25. Presents percentage distribution of ever married women by working status after her first marriage based on data of V711. No data for Bolivia, Brazil, El Salvador, Trinidad and Tobago, Ghana, Liberia, Morocco and Zimbabwe were available.

Table 26. Presents percentage distribution of women by current working status based on data of V714. No data for El Salvador and Liberia were available.

Table 27. Presents percentage distribution of ever married women by husband's number of years of schooling completed based on data of V715.

Table 28. Presents distribution of number of children ever born and number of living children by sex and sex ratios based on data of V202 and V207.

Table 29. Presents percentage distribution of women by place of present residence and previous place of residence in childhood based on data of V102 and V103. No data for Ecuador, El Salvador, Trinidad and Tobago, Botswana, Togo and Zimbabwe were available.

Table 30. presents percentage distribution of never married women by five year age group and singulate mean age at marriage (SMAM) based on data of V501.

Table 31. Presents women's mean and median age at first marriage by age group based on data of V511. "Number" shows the sample size of women by age group.

Table 32. Presents women's mean age at first marriage by educational level based on data of V511 and V106.

Table 33. Presents women's mean age at first marriage by place of present residence based on data of V511 and V102.

Table 34. Presents women's mean age at first marriage by current working status based on data of V511 and V714.

Table 35. Presents women's mean (median, mode) age

- at first marriage by husband's occupation based on data of V511 and V705. No data for El Salvador, Mexico, Liberia were available.
- Table 36.** Presents mean number of household members by women's educational level based on data of V136 and V106. No data for El Salvador was available.
- Table 37.** Presents mean (median, mode) number of household members by place of present residence based on data of V136 and V102. No data for El Salvador was available.
- Table 38.** Presents mean number of household members by women's current working status based on data of V136 and V714. No data for El Salvador was available.
- Table 39.** Presents mean number of household members by husband's educational level based on data of V136 and V701. No data for El Salvador was available.
- Table 40.** Presents mean (median, mode) household size by husband's occupation based on data of V136 and V705. No data for El Salvador, Mexico, Liberia and Togo were available.
- Table 41.** Presents mean number of children ever born by mother's educational level based on data of V201 and V106.
- Table 42.** Presents mean number of children ever born by mother's place of present residence based on data of V201 and V102.
- Table 43.** Presents mean number of children ever born by mother's current working status based on data of V201 and V714. No data for El Salvador and Liberia were available.
- Table 44.** Presents mean number of children ever born by father's educational level based on data of V201 and V701.
- Table 45.** Presents mean (median, mode) number of children ever born by father's occupation based on data of V201 and V705. No data for El Salvador, Mexico and Liberia were available.
- Table 46.** Presents mean number of living children by mother's educational level based on data of V218 and V106.
- Table 47.** Presents mean number of living children by mother's place of present residence based on data of V218 and V102.
- Table 48.** Presents mean number of living children by mother's current working status based on data of V218 and V714. No data for El Salvador and Liberia were available.
- Table 49.** Presents mean (median, mode) number of living children by father's education level based on data of V218 and V701.
- Table 50.** Presents mean (median, mode) number of living children by father's occupation based on data of V218 and V705. No data for El Salvador, Mexico and Liberia were available.
- Table 51.** Presents ideal number of children by women's educational level based on data of V613 and V106.
- Table 52.** Presents ideal number of children by women's place of present residence based on data of V613 and V102.
- Table 53.** Presents ideal number of children by mother's current working status based on data of V613 and V714.
- Table 54.** Presents ideal number of children by husband's education level based on data of V613 and V701.
- Table 55.** Presents mean (median, mode) ideal number of children by husband's occupation based on data of V613 and V705. No data for El Salvador, Mexico and Liberia were available.
- Table 56.** Presents mean years of schooling completed for all women by five year age group based on data of V013 and V133.
- Table 57.** Presents mean years of schooling completed for husband and wife by place of present residence based on data of V133, V715 and V102.
- Table 58.** Presents women's mean years of schooling completed by current working status based on data of V133 and V714.
- Table 59.** Presents wife's mean (median and mode) years of schooling completed by husband's occupation based on data of V133 and V705. Data for El Salvador, Mexico and Liberia are available.
- Table 60.** Presents husband's mean years of schooling completed by occupation based on data of V715 and V705. No data for El Salvador, Mexico and Liberia were available.
- Table 61.** Presents distribution of women with first children ever born by before and after weddings by age group based on data of REC21 and V511.
- Table 62.** Presents number of never married women by with and without children based on data of REC21 and V501.
- Table 63.** Presents age at first birth, age at last birth, length of childbearing period, mean number of children ever born and percent childless for ever married women aged 40-49 based on data of REC21.
- Table 64.** Presents age at first birth, age at last birth, length of childbearing period, mean number of children ever born for ever married women aged 40-49 by educational level based on data of REC21 and V106.
- Table 65.** Presents mean number of children ever born and percent of childless for ever married women aged 40-49 based on data of REC21 and V106.
- Table 66.** Presents age at first birth, age at last birth, length of childbearing period, mean number of

children ever born and percent childless for ever married women aged 40-49 by current working status based on data of REC21 and V714. No data for El Salvador and Liberia were available.

Table 67. Presents age at first birth, age at last birth, length of childbearing period, mean number of children ever born and percent childless for ever married women aged 40-49 by place of present residence based on data of REC21 and V102.

Table 68. Presents birth intervals by parity for ever married women aged 40-49 by educational level based on data of REC21 and V106. The table shows up to parity 10.

Table 69. Presents birth intervals by parity for ever married women aged 40-49 by working status before marriage based on data of REC21 and V709. The table shows up to parity 10. No data for Bolivia, Brazil, El Salvador, Trinidad and Tobago, Liberia, and Zimbabwe were available.

Table 70. Presents birth intervals by parity for ever married women aged 40-49 by working status after marriage based on data of REC21 and V711. The table shows up to parity 10. No data for Bolivia, Brazil, El Salvador, Trinidad and Tobago, Liberia, Ghana, Morocco and Zimbabwe were available.

Table 71. Presents birth intervals by parity for ever married women aged 40-49 by current working status based on data of REC21 and V714. The table shows up to parity 10. No data for El Salvador and Liberia were available.

Table 72. Presents birth intervals by parity for ever married women aged 40-49 by place of present residence based on data of REC21 and V102. The table shows up to parity 10.

Table 73. Presents birth intervals by parity for ever married women aged 40-49 by working status before marriage and place of present residence for based on data of REC21, V709 and V102. The table shows up to parity 10. No data for Bolivia, Brazil, El Salvador, Trinidad and Tobago, Liberia and Zimbabwe were available.

Table 74. Presents number of children ever born, number of living children and survival ratio for ever married women by age group and educational level for countries and regions (Asia, Latin America and Africa) based on data of V201, V218, V012, V106.

Table 75. Presents number of children ever born and number of living children for ever married women aged 15-49 and 40-49 by place of present residence and educational level for countries and regions (Asia, Latin America and Africa) based on data of V201, V218, V012, V102, V106.

Table 76. Presents number of children ever born and

number of living children for ever married women by working status before marriage and educational level for selected countries and regions (Asia, Latin America and Africa) based on data of V201, V218, V102, V106 and V709.

Table 77. Presents number of children ever born and number of living children for ever married women by working status before marriage, age group and educational level for selected countries and regions (Asia, Latin America and Africa) based on data of V201, V218, V012, V106 and V709.

*SMAM: Singulate Mean Age at Marriage

**In Brazil and Guatemala, women of 15-44 years of age were interviewed.

***Includes visiting relationships.

(Source) The figures for North Africa (Egypt, Morocco, Sudan, Tunisia) and Asia are data from Table 1 in Arjun Adlakha et al. "The Role of Nuptiality in Fertility Decline: A Comparative Analysis", (Demographic Health Survey World Conference Proceedings Volume II).

(Note) NO: Number of ever-married women.

MAO: Mean age at first marriage.

Ni(i=1 to 10): Number of mothers with i-th child.

MAi(i=1 to 10): Mean age at the delivery of i-th child.

PO1: Probability of women with 1st child.

MDI01: Median period from marriage to first child delivery of mother.

Pi,i+1: Probability of women with i+1-th child to women with i-th child.

MDli,i+1: Median period from delivery of i-th child to i+1-th child.

Educational level is as follows:

No: No education

Pri.: Primary education

Sec.: Secondary education

High.: Higher education
