## ABOUT IDE-JETRO

### Our Goal: Intellectual Contributions to the World

The Institute of Developing Economies (IDE-JETRO) aims to make intellectual contributions to the world as a leading center of social science research on developing areas. We accumulate locally grounded knowledge on these areas, clarify the respective conditions and issues, and disseminate a better understanding of the issues involved both domestically and abroad. These activities provide an intellectual foundation to facilitate cooperation between Japan and the international community for addressing development issues.
