

Acknowledgements

This report is a product of a research project conducted by the Institute of Developing Economies (IDE) in 2009 under the title of “Responses of Major Rice Exporting Countries to the Global Food Crisis: Cases of Thailand, Vietnam, and India.” We have already published the result in Japanese, in November 2009. Based on the Japanese version, we reassessed the policies of each country and revised the concluding arguments in the last chapter for this English publication.

The authors have been assisted by many colleagues at the IDE in obtaining information about the rice economies of other countries in Asia, Africa and Latin America. We also thank the grain trade experts of Mitsui Corporation in Tokyo for instructing us about the actual administration of the rice trade and Japan’s rice import in the critical period.

During the field survey, we were provided assistance, knowledge, and insights from many people in our case study countries. The chapter on India has benefited immensely from discussions with the following experts; Professor Ramesh Chand of the National Centre for Agricultural Economics and Policy Research, Professor Bharat Ramaswami of the Indian Statistical Institute, Ms. Krishna Sarma of the Corporate Law Group, Dr. Akhilesh Prasad Singh, the former Minister of State for Food and Public Distribution, Mr. Vijay Setia of the All-India Rice Exporters’ Association, and Mr. Vineet Goel of Nav Bharat International Limited. In Vietnam, the discussion with Mr. Nguyen Thi Hien of the Central Institute of Economic Management was particularly helpful. We also extend thanks to the persons in several rice-export companies who gave valuable information to our study. In Thailand, we are deeply indebted for a fruitful field survey to Mr. Pramote Vanichanont of the Thai Rice Mill Association and Mr. Narumit Samak of the Suphanburi Agricultural Extension Office.

The authors

Contributors

Shinichi Shigetomi is a Senior Research Fellow at the Institute of Developing Economies (IDE), JETRO. His research interests are in the fields of rural development, agricultural economics, and social movements in Asia, with special focus on Thailand. He is the co-editor of *Protest and Social Movements in the Developing World* (Cheltenham: Edward Elgar, 2009).

Kensuke Kubo is an Associate Senior Research Fellow at the Institute of Developing Economies (IDE), JETRO, and a visiting researcher at the Indian Statistical Institute, Delhi Center. His research interests are in the fields of agricultural economics and industrial organization, with a special focus on India.

Kazunari Tsukada is a Research Fellow at the Institute of Developing Economies (IDE), JETRO. His research interests lie in the areas of agricultural economics and development economics. One recent focus has been on the comparative study of agricultural policy in Southeast Asian countries.
