ABOUT IDE

Our Goal: Intellectual Contributions to the World

The IDE aims to make intellectual contributions to the world as a leading center of social science research on developing areas. We accumulate locally grounded knowledge on these areas, clarify the respective conditions and issues, and disseminate a better understanding of the issues involved both domestically and abroad. These activities provide an intellectual foundation to facilitate cooperation between Japan and the international community for addressing development issues.

Contents

| | |
|---|-----|
| Preface | v |
| List of Contributors | vii |
| Introduction <i>Michikazu Kojima</i> | 1 |
| 1. Successful Source Separation in Asian Cities: Lessons from Japan's Experience and an Action Research in Thailand <i>Yoshifumi Fujii</i> | 9 |
| 2. Controlling Pollution in Small-scale Recycling Industries: Experiences in India and Japan <i>Michikazu Kojima and Amit Jain</i> | 36 |
| 3. Shipbreaking and Metal Recycling Industries in Taiwan <i>Tadayoshi Terao</i> | 59 |
| 4. Stakeholders' Relationships in Recycling Systems: Experiences in the Philippines and Japan <i>Michikazu Kojima and Ma. Lourdes G. Rebullida</i> | 80 |
| 5. Japan's Automotive Recycling System: Evaluation Three Years after Implementation <i>Kenichi Togawa</i> | 107 |
| 6. A Comparative Study of E-waste Recycling Systems in Japan, South Korea and Taiwan from the EPR Perspective: Implications for Developing Countries <i>Sung-Woo Chung and Rie Murakami-Suzuki</i> | 125 |
| 7. Transboundary Movement of Recyclable Resources: Current Management System and Practices in Japan <i>Aya Yoshida and Michikazu Kojima</i> | 146 |
| Conclusion <i>Michikazu Kojima</i> | 172 |

List of Contributors

Sung-Woo CHUNG is a Ph.D candidate at the Department of Economics and Business Administration at Hokkaido University. He is a part-time lecturer on the Contemporary Economy of South Korea at the Hokkai School of Commerce. He is the author of “Waste in Factories and the 3Rs in South Korea: Focusing on the Waste Reduction Plan in Factories” (in Japanese) (*Ajiken World Trend* [Institute of Developing Economies], no. 145, October 2007).

Yoshifumi FUJII is a Professor in the Faculty of International Studies at Bunkyo University. He received his MA from the School of Mechanical Engineering at Waseda University. He is the co-author of “Calculating Cost-Effectiveness for Activities with Multiple Environmental Effects Using the Maximum Abatement Cost Method” (*Journal of Industrial Ecology* 9, no. 4, 2005: 97-103).

Amit JAIN is the Managing Director of IRG Systems South Asia Pvt. Ltd. He received an MBA from the Asian Institute of Technology and a Masters in Technology from the Indian Institute of Technology in Delhi. He served as team leader for projects on e-waste management, and as financial analyst for projects on the energy sector, which were funded by international donors such as the Asian Development Bank and the United Nations Environment Program.

Michikazu KOJIMA is a Senior Research Fellow at the Institute of Developing Economies (IDE), JETRO. He has studied environmental issues in Indonesia and recycling in the Asian region. He received his M.Sc. from the University of California, Berkeley, in Agricultural and Resource Economics. He edited *International Trade of Recyclable Resources in Asia* (Chiba: Institute of Developing Economies, 2005).

Rie MURAKAMI-SUZUKI is a postdoctoral researcher at the National Institute for Environmental Studies. She received a Ph.D from the Graduate School of Social and Cultural Studies at Kyushu University. Her major is comparative analysis of waste management policies in East Asian countries. She is the author of “Current Status and Issues Surrounding Recycling Policies for Waste Home Appliances in Taiwan” (in Japanese) (*Journal of the Japan Society of Waste Management Experts* 18, no. 4, 2007: 250-63).

Maria Lourdes Genato REBULLIDA is Full Professor in the Department of Political Science at the University of the Philippines Diliman, and had served as Convenor of the Environment in the Health and Development Program as well as Deputy Director for Administration at the University of the Philippines Center for Integrative and Development Studies. She holds a Doctorate in Public Administration and an MA in Political Science from the University of the Philippines.

Tadayoshi TERAŌ is a Senior Research Fellow at the Institute of Developing Economies (IDE), JETRO. He received a masters degree in agricultural economics from the University of Tokyo. He has studied industrial pollution, environmental policies and social movements and agricultural policies in East and South Asia. He is the author of “An Institutional Analysis of Environmental Pollution Disputes in Taiwan: Cases of ‘Self-Relief’” (*Developing Economies* 40, no. 3, 2002: 284-304).

Kenichi TOGAWA is a Professor at Kumamoto University in Japan. He received a doctorate in Economics from Kyushu University in Fukuoka, Japan. He is author of "Background of the Automobile Recycling Law Enactment in Japan" (*Environmental Economics and Policy Studies* 6, no. 4, 2005: 271-83).

Aya YOSHIDA is a researcher at the National Institute for Environmental Studies. She received a Ph.D from the Department of Urban Engineering at the University of Tokyo in 2006. She is co-author of “Secondary Materials Transfer from Japan to China: Destination Analysis in China” (*Journal of Material Cycles and Waste Management* 7, no. 1, 2005: 8-15).
