

IDE Spot Survey

***Deepening Industrial Linkages
Among East Asian Countries***

*In the light of International
Input-Output Analysis*

March 1998

Edited by Takao Sano
Hiroshi Osada

**INSTITUTE OF DEVELOPING ECONOMIES
TOKYO**

The aim of the Institute of Developing Economies (Aija Keizai Kenkyusho) is to conduct basic and comprehensive research on economic and related affairs in Asia and other areas which are on the road to development. It, thereby, contributes to the promotion of economic cooperation and the improvement of trade relations between Japan and these areas and, ultimately, toward the prosperity and welfare of developing countries.

The Institute was founded in December 1958 as a non-profit organization. In July 1960, it was recognized by law as a semi-governmental body.

As of March 1, 1998, the number of staff members was 253, of whom about two-thirds are engaged in research (including 33 stationed overseas), with the rest employed as librarians, statisticians, or secretarial personnel.

The budget of the Institute for the fiscal year 1997/98 is estimated at US\$73.98 million of which 90 percent is subsidized by the government.

IDE Spot Survey intends to respond to public demand by offering prompt and proper analyses of emerging problems in developing countries. Previous issues include **Investment Risk in Post-Deng China**, March 1995, **Dynamic Vietnam**, June 1995, **The Automotive Industry in Asia: The Great Leap Forward?**, October 1995, **Exchange Rate Fluctuations and Asian Responses—Growth Strategy in the Age of Global Money—**, August 1996, **Hong Kong 1997—Society in Transition—**, November 1996, **One Country Two Systems—China's Dilemma—**, March 1997, **Kim Jong Il's North Korea—An Arduous March—**, March 1997, **Cuba's Survival—Socialism with Reality—**, March 1997, **Examining Asia's Tigers—Nine Economies Challenging Common Structural Problems—**, July 1997 and **Economic Outlook for East Asian Economies over the Next Decade—Is Continuous High Growth Possible?**, October 1997.
